ADJUSTABLE LENS MOUNTS

830-0030-02

820-0010

The 830-0030 series adjustable lens mounts provide convenient, precise optics centering and repeatable removal and replacing. Lenses are positioned and locked in place by three rigid shaft assemblies with V-groove tips. Each individually adjustable shaft incorporates a sliding sleeve for rough positioning and diameter setting and collet fix sleeve in place. A thumbscrews at the end of two orthogonal sleeves then provide fine X-Y position adjustment within 3 mm range.

Mounting holes on the support ring provide easy attachment to all mounting elements. Finish: black anodized aluminium.
